PROJECTS

ZeroContext IDPS — Flagship · C++ · Python · PyTorch · scikit-learn · FastAPI · asyncio

· MySQL · Kali Linux

github.com/a23894843/ZeroContext

Multi-threaded **C++ sensor daemon** captures raw /dev/input mouse & keyboard events; streams via **Unix Domain Sockets** to Python asyncio engine at microsecond precision.

PyTorch Autoencoder detects non-human mouse patterns (velocity/acceleration/delta-t reconstruction loss); **Isolation Forest** flags anomalous keystroke dynamics (dwell + flight time).

Full async pipeline: **FastAPI SOC dashboard** (1.5s live refresh) · MySQL threat persistence · JSONL telemetry ledger · auto ML training (Autoencoder + IsolationForest) post-session.

- Cyber Defensive Engine** C++ · Python · ML · UDS
 - Hybrid C++ packet sniffer + Python **unsupervised ML** — real-time DDoS & port scan detection via Unix Domain Sockets.
 - Anomaly detection pipeline with live defensive responses.
- Dr. Vaccine Antivirus** Java · OOP · Security
 - Signature-based file-scanning antivirus** in Java — pattern-matching engine with clean scan UI.
 - Full OOP architecture: encapsulation, abstraction, modular design.
