LeetCode 50 Days Badge 2026 — 133 problems solved · 62-day GitHub streak · 419 contributions · 80E / 47M / 6H · Rank 1,309,499

## SUMMARY

B.Tech CSE (Cybersecurity) · Built **ZeroContext IDPS** — C++/Python/PyTorch/FastAPI real-time intrusion detection with behavioural biometrics · IBM Cybersecurity Fundamentals certified (Credly, ID: PWID-B0454800) · LeetCode: 133 solved, 50 Days Badge 2026 · GitHub: 62-day streak, 419 contributions · Seeking cybersecurity internship / entry-level role.

## TECHNICAL SKILLS

|           |                                                             |          |                                                                                              |
|-----------|-------------------------------------------------------------|----------|----------------------------------------------------------------------------------------------|
| Languages | C++, Python, Java, SQL, MySQL, Bash                         | Security | IDS/IPS, Behavioural Biometrics, Packet Sniffing, Kali Linux, Unix UDS/IPC, Threat Modelling |
| ML / DL   | PyTorch, scikit-learn (Isolation Forest), NumPy, Matplotlib | Tools    | FastAPI, asyncio, aiomysql, Git, GitHub, VS Code, MySQL Workbench, Jupyter                   |

## PROJECTS

■

**ZeroContext IDPS** — Flagship · C++ · Python · PyTorch · scikit-learn · FastAPI · asyncio

■

· MySQL · Kali Linux

[github.com/a23894843/ZeroContext](https://github.com/a23894843/ZeroContext)

Multi-threaded **C++ sensor daemon** captures raw /dev/input mouse & keyboard events at kernel level; streams microsecond-precision telemetry via **Unix Domain Sockets** to Python asyncio engine.

**PyTorch Autoencoder** models mouse kinematics (velocity/acceleration/delta-t) — flags non-human patterns via reconstruction loss; **Isolation Forest** detects anomalous keystroke dynamics (dwell + flight time) in real time.

Full async pipeline: **FastAPI SOC Dashboard** (1.5s live refresh) · MySQL threat log · JSONL telemetry ledger · auto post-session ML training.

**Cyber Defensive Engine** C++ · Python · ML · UDS

- Hybrid **C++ packet sniffer** + Python unsupervised ML — real-time DDoS & port scan detection with automated responses via Unix Domain Sockets.

**Dr. Vaccine Antivirus** Java · OOP · Security

- Signature-based file-scanning antivirus** in Java — MD5 pattern-matching engine, recursive folder scan, real-time directory monitoring, quarantine functionality.

## INTERNSHIP

**Python Intern — CodSoft** Aug 2025  
• **Contact Management System** (Python/Tkinter + MySQL) with full CRUD · **Secure password generator** · GUI game — 3 production apps delivered in 30 days.

## EDUCATION

|                                           |                                                    |              |             |
|-------------------------------------------|----------------------------------------------------|--------------|-------------|
| B.Tech — CS & Engineering (Cybersecurity) | Gurukul Kangri Vishwavidyalaya (Deemed University) | 2023–Present | CGPA: 7.755 |
| 12th & 10th — CBSE                        | S.B.N. International School, Laksar                | 2022 / 2020  | 67% / 70%   |

## CERTIFICATIONS

|                                                                                                           |         |
